Sub: Application No. 09/578,277

Technology Center 2600

Dear Mr. Pendleton:

This letter is about our Patent Application for the Pill Guide, which was filed on May 25, 2000 with the United States Patent Office. So far, according to our Attorney, we have not had a final ruling on this Patent.

As far as we are aware, we have not come across an exact medication device. This is designed to serve a very important function in patient care and also help cut down the cost of medical care and lower complications, as is explained in our original Application for the Pill Guide.

We appreciate it greatly if you will review our application at the earliest and grant us the patent so that we can proceed further.

Thank you,

Sincerely,

C.INDIRA, M.D.
